

STOVE VILMAR

user manual

STARTING:

- * **Remove the cover** (esthetic top)
- * **Open** (put in the vertical) the "smoke outlet" valve.
- * **Open** the "air inlet".
- * Do not remove the ashes. It 'does not matter, just leave them!
- * Place a **fire cube** (ignited) in the combustion chamber by opening the door for starting the fire. The space is a bit tight.
- * Add some pieces of **small wood**.
- * After a minute: Add **larger pieces** from the opening above by removing the flat top cover with the special tool.
- * When the heater is heated: **close** "air inlet"
- * **Do not close the smoke outlet.** Leave it open or half closed, otherwise smoke will come out.
- * Keep the stove on by adding a piece of wood (from the top) once in a while.

RULES:

- * Do not experiment: every stove has its own operation. Always ask if you are not sure!
- * Do not leave the doors of the stove and the flat top cover open.
- * Remove large pieces of wood if they are not fitting.
- * Do not touch the transparent material of the middle door.
- * Do not put candles on or near the stove.
- * Do not burn plastic or plasticized paper: we reuse the ashes in the garden.
- * Avoid spraying water on the stove when showering.
- * Do not put the flat top cover on the floor
